

StepUp Consulting – A Dynamic Marketing & Sales Consultancy team.

StepUp Consulting is a dynamic and fast growing consultancy company, founded in 2010. As consultants we focus on supporting our clients to improve their marketing and sales processes to create growth.

We are active in Revenue Management consultancy:

- /// ROI modelling of the marketing mix (promo and media investments)
- /// Retailer Margin measurement
- /// Sales tracking / Baseline tracking
- /// Price elasticity / Pack price architecture

We operate from our offices in Leuven, but are active in several countries across Europe. To support our continuous growth we are hiring a **Data Architect**.

The JOB – Data Architect

Together with a Business Analyst and a Consultant you will be part of a team working on different projects. As a Data Architect you will be responsible for gathering, structuring and enriching all kinds of different data sources we receive from our clients. This process involves a variety of tasks and tools, providing you with a different challenge each day.

Next to maintaining existing processes, you will also contribute to further optimize/develop the current back office at the company. This gives you the opportunity to develop a wide range of skills, assisting your personal growth while increasing the value we can create for our clients.

Your tasks will consist of:

- /// Data handling
 - /// Structuring a wide range of data sources
 - /// Linking these data sources to create structured databases
- /// Creating tools/platforms to support further analysis of the data
- /// Data modelling:
 - /// Statistical modelling to help predict and understand the data
 - /// Ad hoc analysis
- /// Developments:
 - /// Automation of the existing processes to increase efficiency
 - /// Creating of new processes depending on business needs
 - /// Developing new solutions for clients

The PROFILE – Data Architect with problem solving sense

The StepUp Consulting services are based on pragmatic, fact based and concrete recommendations to increase efficiency and effectiveness. These recommendations are built on the analysis of a large set of client internal data and external data (Nielsen/IRI).

Therefore we look for a candidate with following skills/competences:

Overall:

- Is in possession of a college or university degree with a focus on Economics, Statistics, Data Science or Data Processing

Technical skills:

We are searching for a person with expertise in one or both of the following technical skills:

- Excel/VBA for creating of tools, complex charts, pivot tables, data processing...
- R for data processing/modelling

Nice to know:

- SQL/Access
- Python
- Machine learning/forecasting techniques
- Tableau/Power BI

Personal skills:

- Has an analytical and business mind-set, likes to look further than the numbers
- Is passionate about data and eager to further develop in this field
- Is pragmatic and finds satisfaction in solving complex problems
- Is fluent in Dutch and English.

The OFFER – an attractive package

StepUp Consulting can offer you the possibility to be part of a young, dynamic and growing team with strong opportunities for future growth.

We can offer you a competitive salary, added with a broad range of extra benefits. With our office located near the train station of Leuven easy access is guaranteed.

You will be active in a professional environment, in a fast growing team, where hard work goes hand in hand with good laughs.
